Art Unit: 3735

1. The oath or declaration is defective. A new oath or declaration in compliance with 37 CFR 1.67(a) identifying this application by application number and filing date is required. See MPEP §§ 602.01 and 602.02.

The oath or declaration is defective because:

It does not state that the person making the oath or declaration acknowledges the duty to disclose to the Office all information known to the person to be material to patentability as defined in 37 CFR 1.56.

The declaration filed 3/25/04 includes language stating "material to the examination ... in accordance with 37 CFR 1.56(a), instead of material to the "patentability" ... in accordance with 37 CFR "1.56".

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

3. Claims 1-47 are rejected under 35 U.S.C. 102(b) as being anticipated by Boone et al (2002/0196141).

Boone et al discloses a device or "carestation" that is used to monitor a patient. The device, such as an incubator (44), includes many different sensors to sense many different parameters including at least one environmental sensor and at least two physiological sensors (column 7, line 10- column 8, line 20). The device also includes imputing patient information and diagnosis data and treatment data in order to provide therapy. All of this data is integrated onto one monitor or display (48' and 118) such that data from multiple inputs or sensors is displayed all on one monitor in various combinations (column 18, lines 45-65).
